AFFORDABLE

Our Job is to Simplify Your Project

Whether you're considering how to design an installation, secure an entire building or wanting the latest internet connectivity and cable services in every unit, Correct Cable can deliver state-of-the-art solutions that meet your expectations and budget. We consider it our responsibility to simplify your project, by eliminating the complexities and frustration that can come with trying to understand today's low voltage technologies.

We work with you, from the beginning designs and plans through occupancy, so that what is delivered meets your desires and standards. It's our mission and commitment to you to install the best possible system for your low voltage environment that brings performance and reliability to the end result – customer satisfaction. Correct Cable can provide you with professional service and maintenance that removes the burden of running technical systems and brings resolution to every day operational issues. And to get there means establishing our relationship with you as soon as possible. To bring our expertise to the table, committing to the integrity of the site, the project and the ownership you need. With Correct Cable, you're free to focus on other areas of concern and interest. Because we consider it our job to simplify your project.

Customized Service

Each project, building, or facility brings with it a unique set of criteria. Our first responsibility is to work closely with you to understand your vision and then to interpret that vision into a tangible product and service. Our selection of national vendors and solutions means you're supported by quality products and equipment. Next, we take that knowledge and incorporate it with our history to present a custom solution for you. Correct Cable will provide a unique, customized service that satisfies your immediate needs and understands your future considerations.

Professional

With over 15 years in design, installation and service, Correct Cable has the professional expertise to satisfy your requirements. Trained by industry leaders, our staff attends ongoing product education and certification classes. Considering our association with many projects of varying size, we have a broad background of project history to bring to your environment. Our professional working knowledge of products and system integration will give you the comfort you deserve. In addition, we offer call center solutions and dispatching of trained, professional technicians to your site.

Affordable

We can help you to realize an affordable solution. Too many times, budgets are set before there is an understanding of what a technology will cost. This can lead to overruns and disappointment. Through partnership, the investment we make in getting to understand your specific conditions assists the development of a system that will perform to your standards and budget. There are multiple solutions of varying technical complexity, and they're developing new components on a regular basis. Our relationship with national manufacturers and our industry knowledge allows for better interpretation of what will work best for you. Let Correct Cable sift through the product offering to find the right answer at the right price.

Correct Cable, Inc. is committed to exceeding the expectations of our clients by developing relationships through integrity, professionalism, commitment and service which yields the highest quality low voltage design and installation

"Based on Correct Cable's superior performance at Glacier Canyon, WVO selected the company to provide all the low voltage scope of work for the Great Smokies Lodge Resort in Sevierville, TN. . . . In addition to the low voltage scope of work, WVO added to Correct Cable's contract the construction and implementation of the Saflok wireless door lock system.

We would recommend Correct Cable as a low voltage design build service provider that has the ability to provide development, coordination, plans, and construction of facilities in conformance with an Owner's scope, budget and quality standards."
